

B200 Bleeper Secondary Control System

Designed for people with restricted movement

The B200 is operated by pressing and holding the button. The system will cycle through the secondary functions of the vehicle, giving a bleep as it passes through each function. The function is chosen by releasing the switch at the appropriate bleep. Available for both CANbus and relay vehicles.

Indicators - lights (dip/main & flash) - horn - front wipers (intermittent, low & high speed) - front washers - rear washer & wiper

- Hard wired
- 10 or 13 functions
- New “easy fit” CANbus kits available
- Can be operated by any momentary switch
- Button can be placed at various locations to suit the driver
